CAREER OBJECTIVE

Full Stack Developer with hands-on experience independently building and shipping MERN stack web applications - covering frontend, backend, database design, and third-party API integrations. Proficient in React.js, Next.js, Node.js, Express.js, and MongoDB, with a strong focus on writing clean, scalable, production-ready code. Capable of owning a project end-to-end and integrating real-world business.

SKILLS

Frontend: React.js, Next.js, Redux Toolkit, RTK Query, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, DaisyUI, ShadCN

Backend: Node.js, Express.js, MongoDB, Mongoose, RESTful API, JWT Authentication, Socket.IO

Tools & Integrations: WaSender API (WhatsApp), Google Sheets API, Payment Gateway, Git/GitHub, Vite

EXPERIENCE

Softvance - Frontend Developer

May 2025 – Present

- Developed and maintained client-facing web applications using React.js, Redux Toolkit, RTK Query, and Tailwind CSS.
- Integrated and managed REST APIs with RTK Query for efficient data fetching, caching, and state synchronization.
- Resolved 25+ client-reported UI and data issues, improving application performance and overall user experience.
- Collaborated with designers and backend developers to deliver scalable, responsive, production-ready frontend solutions.

SparkTech - Frontend Developer
2025

January 2025 – March

- Built 3+ client projects using React.js, Redux Toolkit, HTML, CSS, and Tailwind CSS.
- Converted Figma designs into responsive, accessible web interfaces following modern frontend best practices.
- Implemented API integration and state management for dynamic client applications.
- Resolved 15+ bugs related to responsiveness, UI consistency, and cross-browser compatibility.

EDUCATION

BSc in Computer Science & Engineering

National University, Bangladesh

2018 –2022

PROJECTS

WtAppHub - WhatsApp Marketing Automation Platform

[Live URL](#) | [GitHub](#)

A MERN stack bulk-messaging platform for small businesses. Owners connect WhatsApp via QR scan, upload a CSV contact list, and broadcast custom messages instantly.

- Built full frontend and backend using React.js, Node.js, Express.js, MongoDB, TypeScript, and Tailwind CSS.
- Integrated WaSender API for QR-based WhatsApp connection and bulk broadcasting - avoiding the cost and approval overhead of the official Meta Business API.
- Implemented Socket.IO for real-time delivery status updates, progress tracking, and system event notifications.
- Secured with JWT authentication, role-based access control, rate limiting, and request logging.

Chemical Industry E-commerce Platform

Live URL | GitHub

A full-featured e-commerce platform for a chemical supply business with complete admin control over products, categories, and orders.

- Built full CRUD for products, categories, and orders with a dedicated admin dashboard.
 - Integrated automated WhatsApp order notifications - order details sent to admin instantly upon checkout.
 - Used RTK Query for API state management and TypeScript for a type-safe frontend.
 - Designed responsive UI with React.js, Tailwind CSS, DaisyUI, and ShadCN.
-

Perfume E-commerce Website

Live URL | GitHub

A product-focused e-commerce platform for a perfume business, featuring Cash on Delivery checkout and automated Google Sheets order tracking.

- Built full CRUD for products and categories with an admin dashboard for order management.
 - Implemented Cash on Delivery checkout - no payment gateway required, reducing setup complexity.
 - Integrated Google Sheets API to auto-log every placed order in real time for easy tracking.
 - Built with React.js, Tailwind CSS, RTK Query, Node.js, Express.js, and MongoDB.
-

Grocery E-commerce Platform

Live URL | GitHub

A full-stack grocery ordering platform with complete product and order management and automated admin email notifications.

- Built full CRUD for products, inventory, and orders with a complete admin dashboard.
- Automated order notifications via email - admin receives full order details immediately upon placement.
- Implemented JWT authentication, responsive Tailwind CSS UI, and reusable React component architecture.
- Managed API state with RTK Query and built RESTful APIs using Express.js and MongoDB.
